Retractable Gate Manual Series Introduction

Why Choose Southtech?

- **Local Malaysian Supply & Technical Support**
- **Professional Installation & System Commissioning**
- **System Integration Expertise**
- **Troubleshooting & After-Sales Support**
- **Preventive Maintenance Programs Available**
- **Ready Spare Parts Stock in Malaysia**
- **Site Survey & Technical Consultation Available**

Retractable Gate

Manual Series

Introduction

Secure & Durable Design

Available in Aluminium Alloy and Stainless Steel constructions, combining strength, durability, and modern aesthetics for various applications.

Flexible System Integration

Available in track-mounted and trackless configurations, with support for access control systems, license plate recognition, mobile applications, and other smart security solutions.

Complete Local Support

As a Malaysian-based company, Southtech provides supply, installation, system integration, troubleshooting, after-sales support, and preventive maintenance services.

Site Requirements (Automatic Series)

For optimal performance, the installation area must be flat, level, and structurally sound. G30 concrete or above is recommended, while interlocking pavers and damaged surfaces are not advisable.

Advanced Safety Protection

Equipped with anti-collision, anti-climb, overload protection, manual release functionality, and other safety features to ensure reliable and secure operation.

Retractable Gate

Stainless Steel Manual Series

Model : RSW01

Dimensions

Specification

Material	304 Stainless Steel
